A Communicating Thermostat
or an Ecobee Pro 4
Thermostat

Offer valid
05/01/18 - 06/30/18

*This offer is valid for residential customers purchasing an ultra high efficiency inverter drive ac unit. 10 year parts and 10 year labor warranty requires that the system be professionally maintained and serviced twice a year for the warranty period by a licensed and certified air conditioning contractor. To receive the ten year parts warranty, the system must be registered with manufacturer at the time of installation. Warranty does not include refrigerant beyond one pound or air filters for the unit. The unit must be installed prior to June 30th, 2018 or scheduled to be installed before July 15th, 2018 with 50% deposit made to Alford Air Conditioning by June 30th, 2018.

OUR SIMPLE & RELIABLE MAINTENANCE PLAN

Our maintenance program provides detailed inspections twice per year, amazing discounts and priority service.

We will
**INSPECT,

Alford Air Conditioning, Inc. Maintenance Plan provides the above-mentioned services to the resident(s) listed in the tear-off section below. The standard rate for the Maintenance Plan is \$228 for the first air conditioning system and \$145 for each additional air conditioning system. The Maintenance Plan is an annual service agreement between Alford Air Conditioning, Inc. and the below signer. Should the signer receive a discounted rate on the Maintenance Plan, this discount, unless otherwise specified, is applicable for the first year of service only; after which time the Plan will automatically renew at the standard rate. Should the standard rate change Alford Air Conditioning, Inc. will provide a written disclosure of the new rate within a minimum of 15 business days prior to the renewal of service. Additionally, should the signer wish to discontinue or alter his/her air conditioning Maintenance Plan, he/she must do so seven days prior to the renewal date; which is 12 months after the original start date. Maintenance Plan payment is due in full at or prior to the start of the new period. Alford Air Conditioning, Inc. will provide an invoice for the new years' service, via mail and/or electronic mail, 30 days prior to the signers renew date. The 10% discount on repairs applies only to the air conditioning unit(s) that is covered under the Maintenance Plan and the 5% discount on equipment applies only to new parts or equipment that are being replaced or added to the air conditioning unit that was initially covered under the Maintenance Plan, or a new installation of an air conditioning unit(s) at the same location by signer of this agreement. The \$30 discount on the inspection and diagnostic fee is for service to the air conditioning unit(s) that was originally covered by the Maintenance Plan. Alford Air Conditioning Maintenance Plans are non-transferable to a new location or another air conditioning system, unless the new air conditioning unit was installed as a replacement to a unit covered by the Plan.
